

GLIDER KIT

CET offers quality and value with a unique Glider Kit program. Brush truck to Quick-Attack.

Engineered, manufactured and assembled for your convenience. A Glider Kit is composed of a CET drop-in, CET polypropylene heavy duty compartments and a CET custom heavy duty Fire Application flatbed.

GLIDER KIT COMPONENTS:

- CET drop-in units are built with many standard features and a wide range of options
- CET light weight aluminum flat bed body, including the following unique features :
 - ▶ Flat Bed perimeter made from forged 3003-H14 aluminum, for unmatched strength to weight characteristics.
 - ▶ Perimeter made to embed emergency lighting & designed to fit reflective stripping.
 - ▶ Integrated on the left or right side of the flat bed body, CET offers an exclusive all enclosed pre-connect hose tray made from aluminum to hold up to 250' of 1-3/4" hose.
- Wide variety of cabinets, doors, trays (sliding or fixed) made from high impact polypropylene or rigid aluminum sheet.
- NFPA and DOT compliant where applicable.

ADVANTAGES OF A CET GLIDER KIT:

- The Glider Kit package can be installed on a cab and chassis with supplied "U" bolts, Teflon "Dielectric " pads and brackets. This design allows the body and flatbed to withstand greater levels of stress that can distort other commercial style flat-beds. A truly "OFF ROAD" flatbed!
- A modular design allows removal from the chassis for major repair or mounting on a new chassis.
- The flatebed design offers unmatched, exclusive, CET features
- Components are pre-assembled, pre-plumbed and pre-wired and provided to the OEM in a self-contained, tested unit .
- One manufacturer, one shipment to track, one service and warranty source.
- Quick delivery program
